Back-End Skills *	Node JS, SQL, Express, MongoDB
Cloud-DevOps	AWS, Docker, Firebase, CI/CD Pipeline
Languages	C++, C, JavaScript, Data Structure and Algorithms
Soft Skills	Communication, Teamwork, Versatility, Collaborative, Conflict Resolution

EXPERIENCE

Software Developer at 100acress	Gurgaon, Haryana
--	------------------

- Transformed Figma designs into a fully responsive React.js user interface, elevating user engagement metrics by 20% through enhanced usability features and seamless interaction design adjustments throughout the application.
- Led Front-End Development to increase performance by 30% to improve S.C.O .
- Achieved Deployment to AWS, leveraging EC2 to enhance system reliability to 50% and Scalability by 40% using CI/CD Pipeline, Git-Hub Actions.

Software Developer Intern at Tawgl	Gurgaon, Haryana
---	------------------

- Engineered an advanced chat feature for interviews, enhancing real-time communication and increasing user engagement by 30%, while significantly improving feedback collection efficiency by 40%..
- Implemented an efficient notification service using Web socket technology, resulting in a 50% increase in client engagement through real-time server-to-client communication.

PROJECTS

Real-Estate Website. Led the frontend development and implementing an intuitive and responsive user interface by using ReactJS, leveraging AWS EC2 and Nginx for scalable deployment. Optimized the platform, drove user engagement, achieving a steady growth of 5000 new User per month. ([Try it here](#))

AI-Powered Movie Search. Initiated an AI-driven movie recommendation platform using OpenAI's GPT API, resulting in a 30% increase in user interaction through personalized suggestions aligned with individual viewer references. Integrated Firebase authentication into the existing application framework, achieving a 25% increase in user engagement due to improved login experience and strengthened security protocols for customer data. ([Try it here](#))

Restaurant Explorer. Developed a React.js-based food delivery platform with Redux for state management, integrating API's for real-time data, and enhancing UX with features like filtering, sorting, and modals. ([Try it here](#))

Ecommerce Website. Developing a feature-rich Web shopping using the MERN stack, implementing Authentication, Payment-Gateway and integrating multiple services to enhance functionality and user experience. ([Try it here](#))

EXTRA-CURRICULAR ACTIVITIES

- Orchestrated training sessions while leading practices as captain of the National football team, enhancing player skill development across 20+ athletes which culminated in increased overall match readiness.
- Earned recognition as one of the top finalists during the renowned 2020 Hackathon.
