EDUCATION

Bachelor of Technology (Computer Science) , JIET-JODHPUR (SGPA : 8.3/10)	2019 - 2023
Intermediate , St Karen's Secondary School, (CGPA : 8.3/10)	2016 - 2018
High School , Sunbeam Suncity ,Varanasi , (CGPA : (9.2/10)	2014 - 2016

SKILLS

Technical Skills :- React Js , Typescript , Redux , Web-Socket , H.T.M.L , C.S.S, Node Js *, AWS *

Languages :- C++, C , Javascript

Tools :- Git, Firebase, Docker , CI/CD (Beginner)

Soft Skills :- Communication, Teamwork, Versatility, Collaborative , Conflict Resolution

Data Structure & Algorithms Strong Foundation in DSA

Work History

Tawgl (Internship)

[Certificate](#)

- Engineered a chat feature for interviews, boosting real-time communication and increasing user engagement by 30%, while improving feedback collection efficiency by 40%. .
- Implemented Notification service using WebSocket, leading to a 50% boost in client engagement through real-time server-frontend communication..
- Spearheaded UI enhancements and APIs that accelerated product performance by 20%, while also optimizing the app's network performance for enhanced speed and reliability.

PROJECTS

AI-Powered Movie Search | React.js , Redux, Firebase, TailwindCSS | [Github](#)

- Initiated an AI-driven movie recommendation platform using **OpenAI's GPT API**, resulting in a 30% increase in user interaction through personalized suggestions aligned with individual viewer preferences.
- Integrated Firebase authentication into the existing application framework, achieving a 25% increase in user engagement due to improved login experience and strengthened security protocols for customer data.

Aisle Essentials Ecommerce |Reactjs , Mongoddb , Firebase | [Github-F](#) | [Github -B](#)

- Modernized an intuitive shopping experience on the new e-commerce platform by enabling seamless product browsing and checkout functionality resulted in 200 + daily transactions within 2 Quarter of launch.
- Designed a comprehensive admin panel enabling a single administrator to seamlessly oversee 300+ product listings, manage inventory in real-time, and streamline transaction processes for increased operational efficiency.
- Developed functionality allowing multiple users to browse, select, and purchase products, with a streamlined checkout process.

Restaurant Explorer | Reactjs , MealDb API, Redux , Antd | [Github](#)

[Live](#)

[Link](#)

- Developed an intuitive food delivery platform using React.js, leveraging **Redux** for efficient state management.
- Implemented dynamic UI components with Ant Design and optimized responsiveness for seamless multi-device compatibility.
- Integrated APIs to fetch real-time data and enhanced user experience with features like filtering, sorting, and modals.

EXTRA-CURRICULAR ACTIVITIES

- Managed a 17 Members of national-level football team, demonstrating leadership and teamwork skills at the highest level of competition.
